PRODUCT REQUIREMENTS DOCUMENT

Flower E-Commerce & Daily Subscription Platform

Online flower store with one-time purchase and daily flower delivery subscription

Web Application • Flutter Mobile App • Admin Panel • Daily Subscription

VERSION	1.0 (Freelance MVP)
DOCUMENT TYPE	Business understanding, feature list and requirements
PLATFORMS	Web application (full stack) | Mobile application (Flutter)
DATE	October 2026

Contents

1	**Product Overview**	What the platform is, goals, complete feature list and detailed feature tree
2	**Business Understanding**	Customers, order types, daily subscription model, revenue and rules
3	**Core Flows**	Visual flows for purchase, daily subscription and delivery
4	**Web Application (Full Stack)**	Customer website, admin panel, backend services
5	**Mobile Application (Flutter)**	Customer app features, screens and notifications
6	**Orders, Delivery & Notifications**	Statuses, delivery slots and customer messages
7	**Functional Requirements**	Numbered, prioritised requirement list
8	**Quality Requirements**	Security, performance and usability expectations
9	**Business Records**	The main information the platform stores
10	**MVP Scope & Success Criteria**	What is in, what is out and how launch is judged
11	**Assumptions & Open Decisions**	Items to confirm with the client
A	**Appendices**	Screen inventory and glossary

1. Product Overview

1.1 Purpose of this document

This document describes the business and the product requirements for an online flower platform. Customers can buy flowers once, or subscribe to receive fresh flowers every day. It is written for the client, the project team and anyone who needs to understand what will be built, without deep technical detail.

1.2 Product summary

The platform is an online flower store with two ways to buy. A customer can place a normal one-time order for a chosen date, or start a daily flower subscription where fresh flowers are delivered to the same address on every selected day. The business team manages products, stock, orders, subscriptions and deliveries from a simple admin panel.

One-time purchase
Browse, add to cart, pick a date and slot, pay online.

Daily subscription
Subscribe once and receive flowers every day on selected days.

Business control
Admin panel for products, stock, orders and the daily delivery list.

1.3 Product areas

Area	What it provides
Online Store	Browse flowers, view details, add to cart and purchase online.
Daily Subscription	Receive flowers every day (or on chosen days) with full control to skip, pause, change or cancel.
Delivery	Select address, delivery date and an available time window.
Customer Account	Manage profile, addresses, orders, payments and subscriptions.
Notifications	Order, payment, delivery and subscription updates by push, SMS or email.
Admin Panel	Manage products, stock, orders, customers, subscriptions and daily deliveries.

1.4 Product goals

- **Simple and attractive shopping:** a customer can find flowers and finish an order without help.
- **Easy daily delivery setup:** starting and managing a subscription takes only a few taps.
- **Clear daily operations:** the business always sees exactly what to prepare and deliver today.
- **Focused MVP:** only what is needed for ordering and subscriptions, ready to grow later.

1.5 Platform at a glance

The web store, the Flutter mobile app and the admin panel all use one shared backend. This keeps prices, stock, subscription rules and order status identical everywhere.

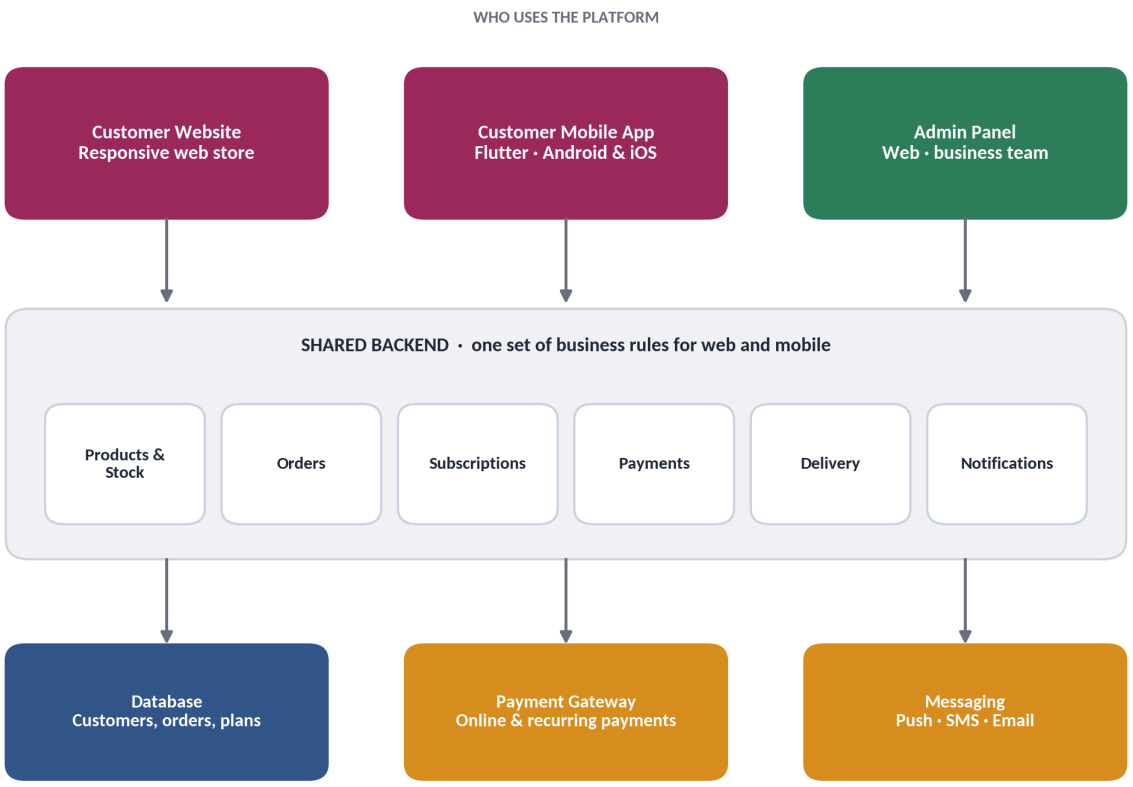

Figure 1 — How the web, mobile and admin parts connect

1.6 Complete feature list

All 65 features of the platform in one place. A dot shows where the feature is available: Web (customer website), Mobile (Flutter app), Admin (admin panel) or Backend (runs automatically).

1.7 Feature tree — detailed breakdown

Each major feature is shown with its sub-features and the small features inside them. The tag on the right shows where the feature is delivered.

1. ACCOUNT & ACCESS Web · Mobile

- **1.1 Sign up & login**
  - Sign up with phone number or email
  - One-time password (OTP) verification
  - Login with phone/email and OTP or password
  - Stay signed in on the device
  - Logout
- **1.2 Password recovery**
  - Forgot password link
  - Reset code by SMS or email
  - Set a new password
- **1.3 Profile**
  - Name, phone and email
  - Edit personal details
  - Language and notification preferences
- **1.4 Saved addresses**
  - Add, edit and delete addresses
  - Set a default address
  - Label addresses (Home, Office, Temple, Shop)
  - Landmark and delivery instructions per address
  - Serviceable-area check when saving

2. PRODUCT DISCOVERY Web · Mobile

- **2.1 Browse**
  - Categories (bouquets, loose flowers, garlands, pooja packs)
  - Occasions (birthday, anniversary, festival, gifting)
  - Featured flowers and best sellers
  - New arrivals

- **2.2 Search & filters**
  - Search by flower or product name
  - Filter by category, price range and availability
  - Sort by price and popularity
  - Subscription-eligible filter
- **2.3 Product detail**
  - Image gallery
  - Name, description and price
  - Size or variant selection
  - Flower care information
  - Availability and next available date
  - Buy once or Subscribe buttons
- **2.4 Extras**
  - Related products
  - Add-ons: greeting cards, vases, small gifts
  - Favourites / wishlist (save and re-order)

3. CART & CHECKOUTWeb · Mobile

- **3.1 Cart**
  - Add items
  - Change quantity and remove items
  - Cart saved while logged in
  - Price and stock check before checkout
- **3.2 Delivery details**
  - Choose or add address
  - Recipient name and phone for gifts
  - Delivery date selection
  - Time slot selection
  - Gift message and delivery instructions
- **3.3 Order summary**
  - Item list with add-ons
  - Coupon code field
  - Delivery fee and total
  - Order type shown (one-time or subscription)
- **3.4 Order confirmation**
  - Order number and summary
  - Expected delivery date and slot
  - Confirmation by push, SMS and email

4. PAYMENTSWeb · Mobile · Backend

- **4.1 Online payment**
  - UPI, cards, net banking and wallets via payment gateway
  - Secure payment page (no card data stored by us)
  - Payment success and failure screens
  - Retry failed payment
- **4.2 Payment records**
  - Payment status per order
  - Payment history for the customer
  - Receipt / invoice for each order

- **4.3 Refunds**
  - Refund for cancelled orders as per policy
  - Refund status visible to the customer
  - Admin-initiated refund

5. DAILY SUBSCRIPTION — SETUP Web · Mobile

- **5.1 Plan selection**
  - Daily flower plans (for example mixed bunch, pooja pack)
  - Plan price per day and per period
  - Eligible products marked as subscribable
- **5.2 Schedule**
  - Delivery days: every day, weekdays only or custom days
  - Start date
  - Plan period: 7, 15 or 30 days
  - Delivery time slot
- **5.3 Address and payment**
  - Choose delivery address
  - Advance payment for the plan period
  - Subscription confirmation with first delivery date

6. DAILY SUBSCRIPTION — MANAGEMENT Web · Mobile

- **6.1 Overview**
  - Plan name, price and status
  - Next delivery date and slot
  - Plan end date and remaining days
- **6.2 Calendar**
  - Upcoming delivery days
  - Skipped and paused days shown
  - Delivered days history
- **6.3 Controls**
  - Skip a single day before cut-off
  - Pause for a date range (for example travel)
  - Resume paused subscription
  - Change delivery days, slot or address
  - Cancel subscription as per policy
- **6.4 Renewal**
  - Plan ending soon reminder
  - Renew with one tap
  - Renew with a different plan
- **6.5 History**
  - Past subscription orders
  - Payments for each plan period

7. ORDERS & DELIVERY TRACKING Web · Mobile

- **7.1 Order list**
  - Current and past orders
  - Filter by one-time or subscription orders
  - Reorder a previous order

- **7.2 Order detail**
  - Items, amount and payment status
  - Delivery address, date and slot
  - Status timeline: Placed, Confirmed, Preparing, Out for Delivery, Delivered
- **7.3 Delivery issues**
  - Report a problem with an order
  - Reschedule after a failed delivery
  - Cancel an order before preparation starts

8. DELIVERY & SCHEDULING RULES Backend · Admin

- **8.1 Service area**
  - Serviceable pincodes / areas
  - Delivery check at address entry
- **8.2 Slots**
  - Configurable time slots (early morning, morning, evening)
  - Slot capacity limits
  - Available dates shown to customer
- **8.3 Cut-off**
  - Daily cut-off time
  - Skip, pause and change locked after cut-off
  - Same-day order rules for one-time orders
- **8.4 Charges**
  - Delivery fee by area
  - Free delivery for subscriptions (configurable)

9. NOTIFICATIONS Mobile · Backend

- **9.1 Order updates**
  - Order placed
  - Preparing
  - Out for delivery
  - Delivered
- **9.2 Payment updates**
  - Payment successful
  - Payment failed with retry link
  - Refund processed
- **9.3 Subscription updates**
  - Subscription started
  - Tomorrow's delivery reminder with Skip option
  - Skipped, paused, resumed, renewed or cancelled
  - Plan ending soon
  - Renewal payment issue
- **9.4 Channels**
  - Push notifications (mobile app)
  - SMS for key events
  - Email confirmations and receipts

10. SUPPORT & HELP Web · Mobile

- **10.1 Self-help**
  - FAQ
  - Delivery and refund policy pages
  - How daily subscription works
- **10.2 Contact**
  - Contact form
  - Call or WhatsApp link
  - Order-linked support request

11. ADMIN — CATALOGUE & STOCK Admin Web

- **11.1 Products**
  - Add, edit and hide products
  - Prices, images and descriptions
  - Variants and sizes
  - Mark as subscription-eligible
- **11.2 Categories & occasions**
  - Create and order categories
  - Assign products to categories and occasions
- **11.3 Subscription plans**
  - Create and edit daily plans
  - Set price and plan periods
  - Activate or deactivate plans
- **11.4 Stock & availability**
  - In stock / out of stock status
  - Daily available quantity
  - Mark unavailable dates

12. ADMIN — ORDERS & DAILY OPERATIONS Admin Web

- **12.1 Dashboard**
  - Orders today and tomorrow
  - Deliveries due by slot
  - Active and paused subscriptions
  - Pending actions (failed payments, failed deliveries)
- **12.2 Today's delivery list**
  - One-time and subscription orders combined
  - Grouped by slot and area
  - Address, phone and notes per delivery
  - Print or export the list
- **12.3 Order management**
  - Search and filter orders
  - Update status (Confirmed, Preparing, Out for Delivery, Delivered)
  - Mark delivery failed with reason
  - Cancel order and trigger refund

13. ADMIN — SUBSCRIPTIONS & CUSTOMERS Admin Web

- **13.1 Subscriptions**
  - List by Active, Paused, Cancelled, Completed
  - View schedule, skips and next delivery
  - Pause, resume or cancel on behalf of customer

- **13.2 Customers**
  - Customer list and search
  - Profile, addresses and contact details
  - Order and subscription history

14. ADMIN — SETTINGS, COUPONS & REPORTS Admin Web

- **14.1 Settings**
  - Delivery areas, slots and charges
  - Cut-off time
  - Notification templates
  - Admin users and roles
- **14.2 Coupons**
  - Create percentage or fixed discount codes
  - Validity dates and usage limit
  - Activate or deactivate
- **14.3 Basic reports**
  - Daily orders and deliveries
  - Sales summary by day
  - Subscription count by status

15. PLATFORM & BACKEND AUTOMATION Backend

- **15.1 Daily scheduler**
  - Creates next day's orders at cut-off
  - Skips paused and skipped days
  - Ends plans on their last day
- **15.2 Payment handling**
  - Confirms payments with the gateway
  - Puts subscription on hold when payment fails
  - Releases hold when payment is fixed
- **15.3 Security & safety**
  - Secure login and role-based admin access
  - Encrypted connections
  - Regular data backups
  - Activity logs for admin actions

16. MOBILE-SPECIFIC EXPERIENCE Mobile (Flutter)

- **16.1 App navigation**
  - Bottom tabs: Home, Shop, Orders, Subscriptions, Account
  - Splash and welcome screens
- **16.2 Mobile conveniences**
  - Push notifications with Skip action
  - Quick reorder
  - Saved login on the device
  - Share product link
- **16.3 Release**
  - Android (Play Store) and iOS (App Store) from one Flutter codebase

17. WEB-SPECIFIC EXPERIENCEWeb

- **17.1 Landing page**
  - Hero with Shop Now and Start Daily Subscription
  - Featured flowers and best sellers
  - How daily subscription works
  - Shop by category or occasion
  - Why choose us, reviews, service area, FAQ and footer
- **17.2 Responsive design**
  - Works on desktop, tablet and phone
  - Fast loading product pages

2. Business Understanding

2.1 Business background

Flowers are bought for two very different reasons: special moments (birthdays, anniversaries, gifts) and everyday freshness (home, office, shop counter, temple or reception). Most online flower stores handle the first well but make regular delivery awkward. This platform serves both.

> **THE OPPORTUNITY**
> A daily flower subscription turns a one-time buyer into a regular customer. Revenue becomes predictable, demand can be planned a day ahead, and wastage of fresh stock is reduced.

2.2 Customer types

Customer	What they need	Features that serve them
Occasional buyer	Flowers for a specific occasion or date.	Browse, scheduled delivery, quick checkout.
Daily customer	Fresh flowers delivered every morning, such as for home or puja.	Daily subscription, saved address, skip / pause / cancel.
Gift buyer	Send flowers to someone else with a message.	Recipient details, gift note, delivery scheduling.
Business customer	Regular flowers for an office, shop, hotel or venue.	Daily or custom-day plans, saved address, support.

2.3 Order types

Order type	Description
One-time order	The customer buys a specific flower order and chooses one delivery date and slot.
Subscription order	The customer starts a daily plan. Each delivery day automatically creates one delivery order that the business prepares and delivers.

2.4 How the daily subscription works

This is the heart of the business. The model below is the recommended approach for the first release and is confirmed with the client in Section 11.

1. The customer picks a flower plan, for example a daily mixed-flower bunch or a daily pooja flower pack.
2. The customer chooses delivery days (every day, weekdays only or custom days), a start date and a delivery time slot.
3. The customer pays in advance for a plan period, such as 7, 15 or 30 days.

4. Every night at a fixed cut-off time, the system creates the next day's delivery orders for all active subscriptions.
5. The admin team sees one daily delivery list, prepares the flowers and sends them out.
6. The customer receives updates and the cycle repeats until the plan period ends or the customer cancels.

CUT-OFF TIME

Skip, pause and change requests must be made before the daily cut-off (for example 9 PM the night before). After the cut-off, tomorrow's order is locked so the team can prepare with certainty.

2.5 Revenue model

- **One-time sales:** flowers bought for a chosen date.
- **Subscription payments:** advance payment for daily delivery plans.
- **Add-ons:** greeting cards, vases and small gifts at checkout.
- **Delivery charges:** optional, depending on location or plan.

MVP BUSINESS LOOP

Customer discovers flowers → places an order or subscribes → payment succeeds → business prepares the order → delivery is completed → customer returns.

2.6 Key business rules

ID	Rule
BR-01	Only products marked available can be purchased or subscribed to.
BR-02	Delivery dates and slots depend on the customer's serviceable location.
BR-03	Subscription changes (skip, pause, change) must be made before the daily cut-off.
BR-04	Each subscription delivery day creates its own order record for the business to fulfil.
BR-05	A skipped day is not delivered; how it is credited or extended follows the agreed policy.
BR-06	If a subscription payment fails, the next deliveries are put on hold until it is fixed.
BR-07	A subscription ends automatically on its last day unless the customer renews.
BR-08	Refund and cancellation rules are finalised with the client before launch.

2.7 How the business measures success

Orders

Orders placed per day and completed deliveries.

Subscriptions

Active daily subscribers and renewals.

Delivery

On-time deliveries and failed deliveries.

3. Core Flows

The diagrams below show how customers and the business move through the platform. Pink steps are customer actions and green steps are done by the platform or the business.

3.1 One-time purchase

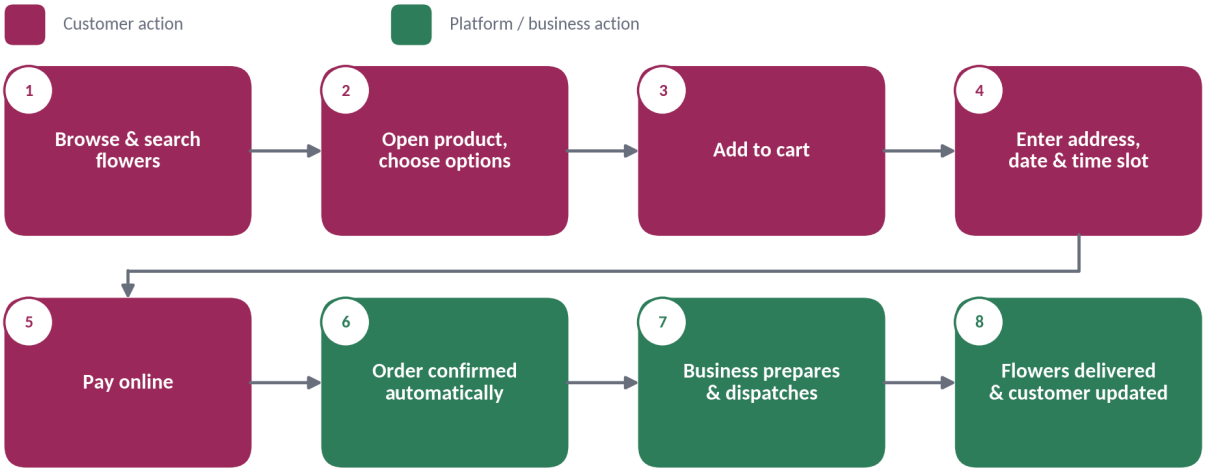

Figure 2 — One-time flower purchase journey

3.2 Daily subscription journey

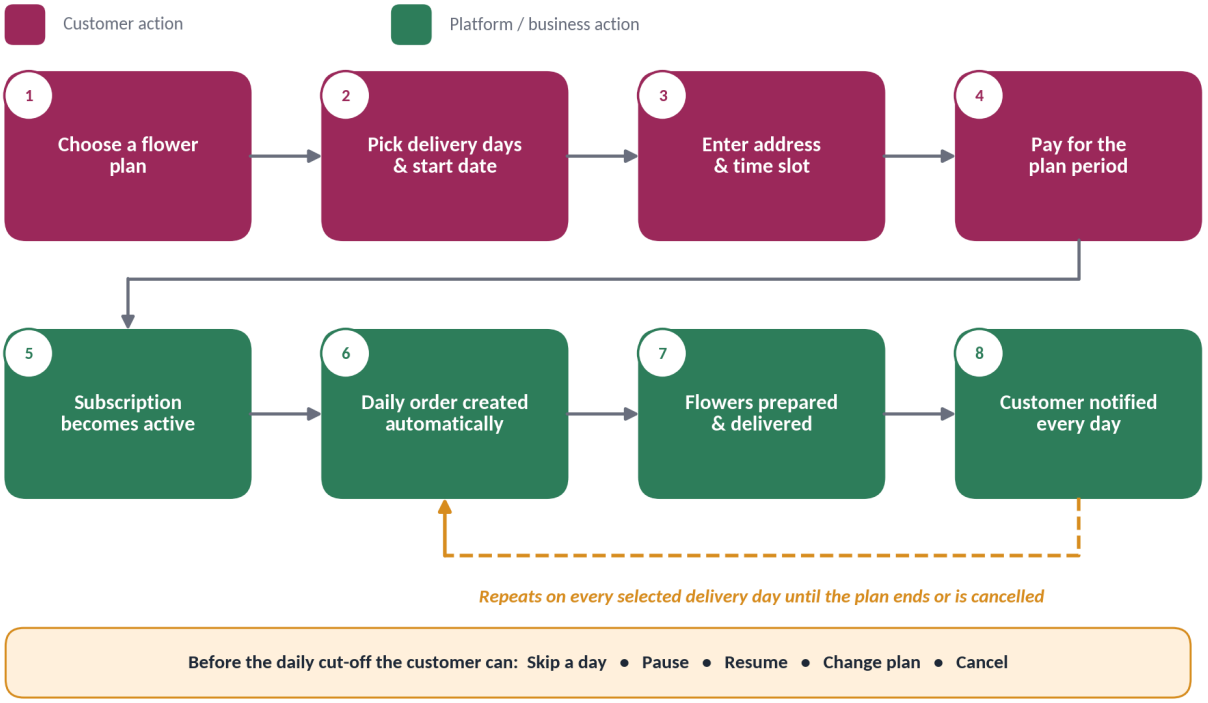

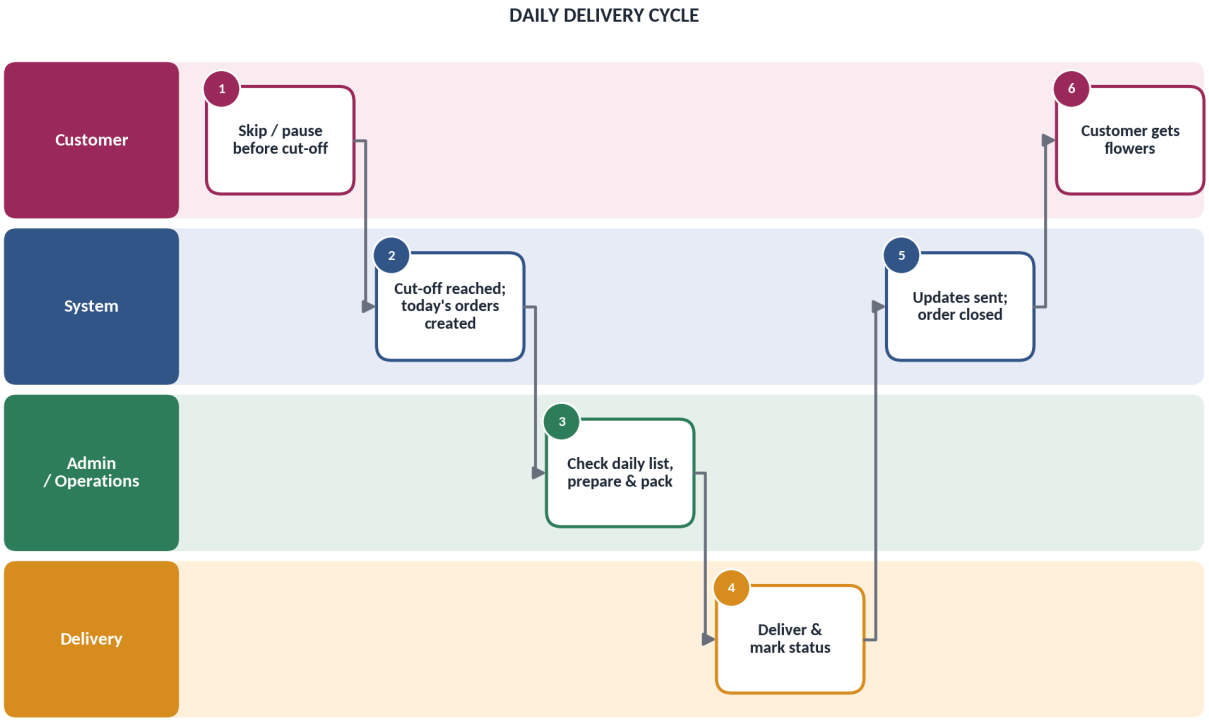

Figure 3 — Daily flower subscription journey

3.3 Daily delivery cycle

This cycle runs every delivery day and connects the customer, the system, the admin team and the delivery person.

Every delivery day follows the same cycle, so the business always works from one clear list.

Figure 4 — Daily delivery cycle by role

3.4 Subscription states

A subscription is always in one clear state. The diagram shows how it moves between them.

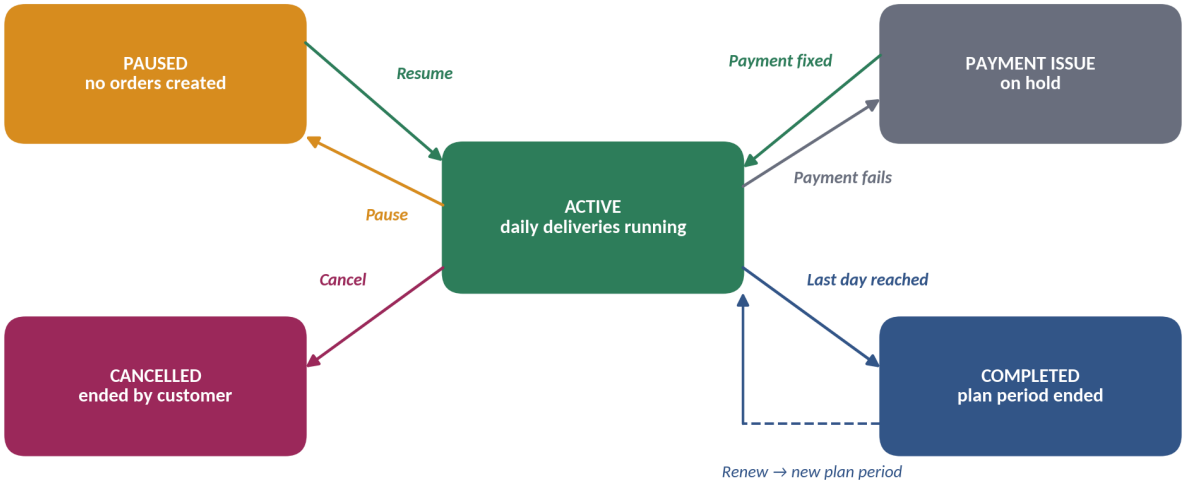

Figure 5 — Subscription lifecycle

3.5 Order status flow

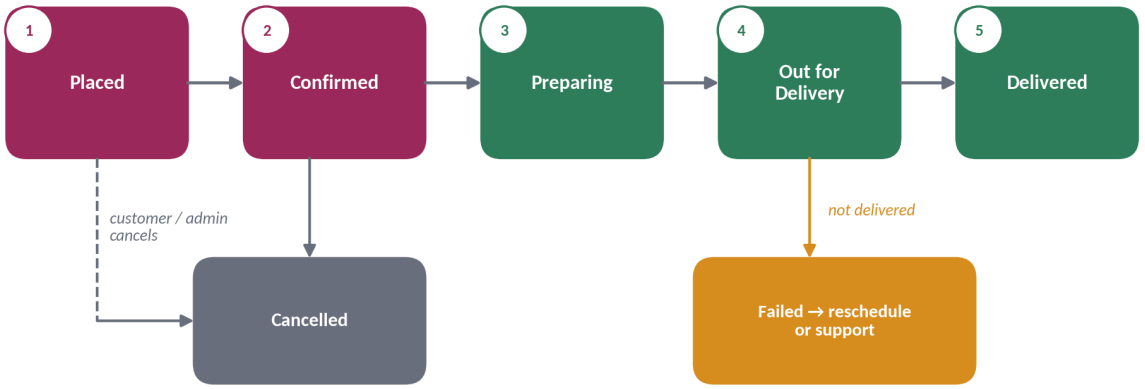

Figure 6 — Order status flow

4. Web Application (Full Stack)

WEB SCOPE

The web part has three layers: the customer website, the admin panel for the business team, and the backend that runs all rules and stores all data. The website is fully responsive and works well on phones.

4.1 Customer website

Landing page

Section	Content
Header	Logo, Shop, Subscriptions, About / Contact, account and cart.
Hero	Clear flower-shopping message with main buttons: Shop Now and Start Daily Subscription.
Featured flowers	Best sellers and new arrivals.
Subscription section	How daily delivery works, plans and starting prices.
Shop by category	Occasion or flower type shortcuts.
Why choose us	Freshness, on-time delivery and service highlights.
Reviews	Customer testimonials.
Service area	Where delivery is available.
FAQ and footer	Common questions, contact details, policies and social links.

Store and product pages

Feature	Details
Category and product grid	Browse by category or occasion with image, name, price and availability.
Search and filters	Search by name; filter by category, price and availability.
Product detail	Image gallery, description, size or variant, and care information.
Buying options	One-time purchase, or Subscribe for eligible products.
Related items and add-ons	Greeting cards, vases and small gifts.

Cart and checkout

Step	Details
Cart	Change quantity, remove items, apply a coupon if enabled.

Step	Details
Delivery details	Choose or add an address and recipient details for gifts.
Date and slot	Pick an available delivery date and time window.
Subscription setup	For plans: choose delivery days, start date and plan period.
Notes	Gift message and delivery instructions.
Payment	Review total and pay online.
Confirmation	Order or subscription confirmation with details.

Customer account

Screen	Features
Profile	Name, phone, email and basic details.
Addresses	Add, edit, delete and set a default address.
My orders	Order history, details and live delivery status.
My subscriptions	Current plan, next delivery, calendar of upcoming days and all controls.
Payments	Payment history and status.
Support	FAQ and contact support.

Subscription management

Action	What the customer can do
View plan	Plan name, price, delivery days, slot and plan end date.
Upcoming deliveries	See the next days on a simple calendar.
Skip a day	Skip any upcoming delivery before the cut-off.
Pause and resume	Pause for a period (for example while travelling) and resume later.
Change plan	Change delivery days, slot or address where allowed.
Renew or cancel	Renew when the plan ends, or cancel following the policy.
History	See all past subscription deliveries.

4.2 Admin panel

The admin panel is used by the business team on the web. It is intentionally simple and focused on daily operations.

Module	Features
Dashboard	Orders today, deliveries due, active subscriptions, pending actions.
Today's delivery list	All one-time and subscription deliveries for the day, grouped by slot, with address and notes. Printable.
Products	Add or edit products, prices, images, categories and availability.
Subscription plans	Create and edit daily plans, prices and plan periods.
Stock	Simple available or out-of-stock status and quantity per day.
Orders	Search, view and update order status and delivery details.
Subscriptions	View active, paused and cancelled subscriptions and next delivery.
Customers	View customer details, addresses, orders and subscriptions.
Delivery settings	Serviceable areas, delivery slots, charges and cut-off time.
Coupons	Create simple discount codes.
Basic reports	Daily orders and basic sales summary.

4.3 Backend — what it does for the business

The backend is the single brain behind the website, the mobile app and the admin panel. It does the following:

Service	Responsibility
Accounts	Sign up, login, password recovery and customer profiles.
Catalogue	Products, categories, prices, stock and availability.
Orders	Create orders, track status and keep order history.
Subscriptions	Plans, delivery days, skip, pause, resume, renew and cancel rules.
Daily scheduler	Every night, creates the next day's orders for all active subscriptions.
Payments	Online payment, advance subscription payment, payment status and refunds.
Delivery	Areas, slots, cut-off rules and delivery status.
Notifications	Sends push, SMS and email messages on every important event.
Admin access	Secure login and role-based access for the business team.

4.4 Suggested technology (kept simple)

Part	Suggestion
Website	Standard responsive web framework (for example React / Next.js).

Part	Suggestion
Backend	Standard server application with a REST API (for example Node.js).
Database	Relational database (for example PostgreSQL).
Payments	One trusted payment gateway supporting online payments (for example Razorpay).
Messaging	Push notifications, SMS and email through standard providers.
Hosting	A simple cloud hosting setup.

These are suggestions only and can be changed to match the freelancer's and client's preference.

5. Mobile Application (Flutter)

MOBILE SCOPE

The mobile app is for customers and is built with Flutter, so one codebase delivers both Android and iOS apps. It focuses on fast shopping, easy daily subscription management and delivery updates. Admin functions stay on the web.

5.1 Main navigation

Tab	Purpose
Home	Featured flowers, categories and a daily subscription shortcut.
Shop	Browse, search and open product details.
Orders	Current and past orders with live status.
Subscriptions	Active plan, upcoming deliveries and controls.
Account	Profile, addresses, notifications and support.

5.2 Mobile features

Area	Features
Access	Welcome screens, sign up, login with phone or email OTP, password recovery.
Browse and search	Home, categories, search and basic filters.
Product	Product details with images, price, options and care information.
Buying	One-time purchase and daily subscription purchase.
Cart and checkout	Cart, address, date and slot, gift note, coupon and payment.
Orders	Order list, order details and delivery status tracking.
Subscriptions	View plan, calendar of upcoming days, skip, pause, resume, renew and cancel.
Addresses	Save and manage multiple delivery addresses.
Favourites	Save favourite products for quick re-ordering.
Notifications	Push notifications for orders and subscriptions.
Support	Help centre, FAQ and contact support.

5.3 Subscription experience on mobile

Managing a daily subscription is the most frequent action on mobile, so it is made quick:

- **Subscription card:** shows plan, next delivery and status on the Subscriptions tab.
- **Upcoming days calendar:** each upcoming day can be skipped with one tap before the cut-off.
- **Pause for a period:** choose from and to dates, for example while travelling.
- **Renew reminder:** a clear prompt before the plan period ends.

5.4 Mobile notifications

Notification	When it is sent
Order placed	As soon as an order is confirmed.
Payment successful or failed	After every payment attempt.
Order being prepared	When the business starts preparing.
Out for delivery	When the order leaves for delivery.
Order delivered	When delivery is completed.
Tomorrow's delivery reminder	Evening reminder before the cut-off, with a Skip option.
Plan ending soon	Shortly before the plan period ends.
Subscription payment issue	When a renewal payment needs attention.

5.5 Suggested technology (kept simple)

Part	Suggestion
App framework	Flutter, one codebase for Android and iOS.
Data connection	The same backend and API used by the website.
Push notifications	Standard push notification service (for example Firebase).
Payments	Same payment gateway as the website.
Release	Google Play Store and Apple App Store.

6. Orders, Delivery & Notifications

6.1 Order status

Status	Meaning
Placed	Order was created successfully.
Confirmed	The business accepted the order.
Preparing	Flowers are being prepared and packed.
Out for delivery	The order is on its way.
Delivered	The customer received the order.
Cancelled	The order will not be fulfilled.
Failed	Delivery could not be completed.

6.2 Delivery features

- Delivery address and recipient details.
- Available delivery dates and time slots, for example early morning, morning and evening.
- Delivery instructions, such as landmark or gate details.
- Delivery fee where applicable.
- Delivery status updates and a simple reschedule or support flow for failed deliveries.
- Daily cut-off time that locks tomorrow's orders for preparation.

6.3 Customer notifications

Event	Message content	Channel
Order confirmation	Order number, items, amount and expected delivery.	Push, SMS, Email
Payment issue	Payment failed and action required.	Push, SMS
Preparing	Order is being prepared.	Push
Out for delivery	Order is on the way.	Push, SMS
Delivered	Delivery completed.	Push
Subscription started	Plan, delivery days, first delivery date.	Push, Email
Delivery reminder	Tomorrow's delivery, with option to skip.	Push
Subscription update	Skipped, paused, resumed, renewed or cancelled.	Push, Email
Subscription payment issue	Renewal payment needs attention.	Push, SMS, Email

7. Functional Requirements

Priority follows MoSCoW: Must is required for launch, Should is important but can follow, Could is optional.

ID	Requirement	Platform	Priority
FR-01	Customer can browse available flower products by category.	Web, Mobile	Must
FR-02	Customer can search and filter products and view product details.	Web, Mobile	Must
FR-03	Customer can add products to the cart and edit it.	Web, Mobile	Must
FR-04	Customer can place a one-time order.	Web, Mobile	Must
FR-05	Customer can select delivery address, date and time slot.	Web, Mobile	Must
FR-06	Customer can complete online payment.	Web, Mobile	Must
FR-07	Customer can sign up, log in and recover password.	Web, Mobile	Must
FR-08	Customer can save and manage multiple addresses.	Web, Mobile	Must
FR-09	Customer can subscribe to an eligible daily plan.	Web, Mobile	Must
FR-10	Customer can choose delivery days, start date, slot and plan period.	Web, Mobile	Must
FR-11	System creates the next day's orders for all active subscriptions at the cut-off time.	Backend	Must
FR-12	Customer can skip a delivery, pause, resume and cancel within the policy.	Web, Mobile	Must
FR-13	Customer can renew a subscription when the plan period ends.	Web, Mobile	Must
FR-14	Customer can view order and subscription history.	Web, Mobile	Must
FR-15	Customer receives relevant notifications for orders and subscriptions.	Backend, Mobile	Must
FR-16	Subscription is put on hold when a recurring payment fails.	Backend	Must
FR-17	Admin can manage products, categories, prices and availability.	Admin Web	Must
FR-18	Admin can manage subscription plans and view all subscriptions.	Admin Web	Must
FR-19	Admin can view and update orders and delivery status.	Admin Web	Must
FR-20	Admin can view today's combined delivery list grouped by slot.	Admin Web	Must
FR-21	Admin can configure delivery areas, slots, charges and cut-off time.	Admin Web	Must
FR-22	Admin can view customers and their order history.	Admin Web	Must
FR-23	Mobile app supports the full core customer journey.	Mobile	Must
FR-24	Business can create simple coupons.	Admin Web	Should

ID	Requirement	Platform	Priority
FR-25	Admin can print or export the daily delivery list.	Admin Web	Should
FR-26	Admin can see basic daily order and sales reports.	Admin Web	Should
FR-27	Customer can offer add-ons such as cards and vases at checkout.	Web, Mobile	Should
FR-28	Customer can save favourite products.	Web, Mobile	Could
FR-29	Customer can leave a rating or review after delivery.	Web, Mobile	Could

8. Quality Requirements

Area	Expectation
Ease of use	A first-time customer can order without help; subscription controls are reachable in two taps.
Speed	Pages and screens load quickly on normal mobile internet.
Security	Secure login, encrypted connections, and no card details stored on our servers.
Reliability	Daily orders are created on time every day; failures are logged and alerted.
Compatibility	Website works on current browsers and phones; app supports current Android and iOS versions.
Maintainability	Clean, documented code so features can be added later.
Data safety	Regular backups of orders, customers and subscriptions.

9. Business Records

These are the main pieces of information the platform stores.

Record	Purpose
Customer	Profile and contact information.
Address	Saved delivery and recipient details.
Product	Flower information, price, images and availability.
Subscription plan	Plan name, price, delivery pattern and plan period.
Cart	Items currently selected for purchase.
Order	One-time order or one daily subscription delivery.
Subscription	A customer's active plan, schedule, skips and pauses.

Record	Purpose
Payment	Payment transaction and status.
Delivery	Delivery slot, status and notes.
Coupon	Discount code and rules.
Notification	Messages sent to the customer.

10. MVP Scope & Success Criteria

10.1 Included in the MVP

- Responsive web landing page and online store.
- Customer account and saved addresses.
- One-time flower ordering.
- Daily subscription plans with skip, pause, resume, renew and cancel.
- Online payment.
- Order and delivery status, and the daily delivery list.
- Transactional notifications.
- Basic admin panel.
- Flutter mobile app for customers (Android and iOS).

10.2 Not in the first release

- AI features and advanced recommendations.
- Loyalty or points system.
- Multi-vendor marketplace.
- Route optimisation and live rider tracking.
- Large analytics dashboards.
- Complex enterprise account workflows.

10.3 Launch success criteria

- A customer can discover flowers and complete a purchase without assistance.
- A customer can start a daily subscription and receive the next scheduled delivery.
- A customer can skip, pause or cancel within the agreed rules.
- The business can see and process the daily delivery list from the admin panel.
- Customers receive clear order, payment and delivery notifications.

11. Assumptions & Open Decisions

The following items affect the design and should be confirmed with the client before development starts. A suggested default is given for each.

Decision	Why it matters	Suggested default
Billing model for daily plans	Decides how and when the customer pays.	Prepaid for a plan period (7 / 15 / 30 days).
Daily cut-off time	Locks orders for preparation.	9 PM the night before.
Skipped days	Fairness to the customer.	Extend plan end date by skipped days.
Delivery slots	Planning of the delivery team.	Early morning, morning and evening.
Service area	Where delivery is possible.	Defined by pincode or area list.
Delivery charges	Pricing.	Free for subscriptions, flat fee for one-time.
Refund and cancellation policy	Legal and customer trust.	To be provided by the client.
Payment gateway	Setup and fees.	One gateway supporting UPI and cards.
Who delivers	Operations.	Client's own delivery staff, updated by admin.

Appendix A — Screen Inventory

Web	Mobile (Flutter)
Landing page	Home
Shop / category	Shop
Product detail	Product detail
Cart	Cart
Checkout	Checkout
Order confirmation	Order confirmation
My orders	Orders
Subscription pages	Subscriptions
Profile and addresses	Account
Support / FAQ	Support
Admin dashboard	Not applicable
Admin products, plans, orders, subscriptions	Not applicable

Appendix B — Glossary

Term	Meaning
Subscription	A recurring plan where flowers are delivered on selected days.
Plan period	The paid duration of a subscription, such as 30 days.
Cut-off time	The daily time after which tomorrow's orders can no longer be changed.
Delivery slot	A time window in which delivery is expected.
Skip	Not receiving flowers on one specific day.
Pause	Temporarily stopping deliveries for a period.
MVP	Minimum viable product — the focused first release.
Flutter	A framework that builds Android and iOS apps from one codebase.
